

MORITO SCOVILL

DOT® Medical Sockets

Features and Benefits:

In the high-stress environment of a hospital, the “little things” like medical sockets are an afterthought. But the difference in a clear ECG reading can come down to just that, the “little things”.

- Universal and conductive DOT® Medical Sockets are compatible with most ECG/EKG electrodes and lead wires.
- The new Dome Style Socket is designed to enable the lead wires to be easily soldered into place.
- Compatibility between sockets and studs provides your product with the perfect pairing for both design and functionality.
